

# Living at VOA Kavala Greece Relay Station

This documented account of living and working at the VOA Kavala Greece Relay Station, KRS, was graciously donated by two long term employees: Darrel Duckworth and George Tsataltzions.

# A WARM WELCOME TO KAVALA RELAY STATION

This brochure provides some information concerning Kavala Relay Station and its operations so that you can become more comfortable in your assignment here. We hope you enjoy your new home and welcome you as a member of the KRS family!

Welcome to the nest!

#### THE COUNTRY

Greece, both a mountainous and an archipelagic country, is bordered on the north by Bulgaria, Yugoslavia and Albania; on the east by Turkey and the Aegean Sea; and on the south and west by the Mediterranean and Ionian Seas. The land area, including the islands, is about the size of Alabama. Only 25% of the land is arable, and much of that is dry and rocky.

Greece's population is over 10 million; 4.3 million live in Athens, and 1 million in Thessaloniki. About 28% of the populace works on farms. However, with continuing exodus from villages to urban areas as Greece's economy develops, this percentage may decline. About 30,000 Americans reside in the Athens area. Some are retired Greek-Americans, others represent private business firms. A large number of U.S. and Northern European tourists visit Greece during the summer.

Greece's climate is comparable to the climate in the U.S.' southern states. In winter (December through February) temperatures reach the 30's and low 40's, with a few days of below-freezing weather. Northern Greece gets its rain in winter and early spring. In summer (June through August) temperatures range in the 70's and 80's, with only a few days over 90 degrees Fahrenheit.

Greek Orthodox is the predominant religion, claiming a 98% following.

Under the 1975 Constitution, Greece is a parliamentary democracy with a President as Head of State, a Prime Minister as Head of Government, and a 300-seat Parliament. Voting is mandatory. Democracy was restored in Greece in 1974, following the collapse of the seven-year military junta. Major parties include New Democracy, currently in power, the center-left Panhellenic Socialist Movement (PASOK), and the Greek Communist Party (KKE).

Greece is a member of the European Community, NATO, the Council of Europe, and the United Nations.

# GREECE

Voice of America's Kavala Relay Station is located in mainly an agricultural area in the northeastern part of Greece, 500 miles by road from Athens and 150 miles from Thessaloniki.

The nearest population center of significant size is XANTHI, located 20 miles north of the Station. Xanthi is a militarily strategic center whose old section, built up the hillside and crisscrossed by flagstoned lanes, still contains two working monasteries and quaint traditional homes with wrought-iron balconies and red-tiled roofs. Xanthi's old and new mingle in a harmonious blend, as does the ethnic and religious diversity of its 40,000 inhabitants: 80% Christian and 20% Muslim.

The Relay Station's namesake, KAVALA, is located 45 miles from the Station's headquarters via a road which crosses the Nestos River and passes through scenic farmland, with a backdrop of rugged mountains. With a population of about 70,000, Kavala is a mixture of traditional and modern. Its seaport accommodates light shipping, and fishing boats operate from there. It is a popular tourist city, with a picturesque old quarter, Byzantine fortress and Roman aqueduct.

A few miles from Kavala are the ruins of the ancient city of PHILIPPI, named by Alexander the Great in honor of his father. Portions of St. Paul's first churches in Europe still remain on the site where St. Paul preached his first sermon in Europe. The ancient theater of Philippi continues to be used during the summer for cultural programs.

The island of THASSOS provides a popular summer day's outing for Station residents. It is reached by a 45-minute drive to Keramoti plus a 30-minute ferry ride. In addition to its beautiful sandy beaches and tourist souvenir shops, Thassos is the site of an ancient city with some marble ruins and monuments still remaining.

# THE SITE

Kavala Relay Station is one of Voice of America's largest overseas radio relay stations. It consists of two separate facilities sites, the transmitter plant and the receiver plant.

The TRANSMITTER PLANT site occupies 2,000 acres of flat land bordered on one side by the Aegean Sea. Near the western border of the plot is the mouth of the Nestos River. The site contains the buildings for the transmitter plant which houses the Station's administrative offices and transmitting plant operation, the power plant and nearby diesel fuel storage tanks with a capacity of 1.5 million gallons, the warehouse, garage and support services building, an antenna field, 15 houses for American families, and private beach facilities.

The 10-acre RECEIVER PLANT site, located near the village of Agiasma, is only 10 miles, as the crow flies, from the transmitter/ housing area. By road, however, one must travel 78 miles round trip, due to an unbridged section of the Nestos River. The site contains the receiver plant building, a small power plant building, and an antenna field. This site will close when the two-way SIS (Satellite Interconnect System) is installed.

The receiver plant receives VOA radio programs from the U.S. and transmits them to the transmitter plant, where medium and shortwave radio broadcast transmitters using directional antennas rebroadcast them to target areas. Over 5,000 hours of Voice of America programming are broadcast monthly in 22 languages and dialects to East and Central Europe, Central and South Asia, the Middle East and Africa.

The transmitter facilities have a combined power of over 3 million watts: -- One 500,000 watt mediumwave transmitter -- Ten 250,000 watt shortwave transmitters

-- Two 50,000 watt shortwave transmitters

The POWER PLANT consists of six power generating units with a total output capacity of 13.5 million watts. (These units could produce enough electricity to serve the needs of a medium-sized city.) Over 2.6 million gallons of diesel fuel area used yearly. Daily consumption is approximately 7,000 gallons.

# THE SITE

# OVERALL VIEWS

Transmitter, Warehouse and Power Plant Buildings (Note Thassos Island in Background)

# AT HOME

The three or four bedroom residences are furnished with basic items such as living, dining, bedroom and patio furniture, carpeting, draperies, central heating and air, humidifier, essential lamps, an electric range with oven, microwave oven, refrigerator, freezer, washer, dryer, and dishwasher. The Station's power supply is 120 volts, 50 Hz, so most American appliances can be used. The Station also provides the interior light bulbs. Each residence contains one queen-size bed; all other beds are twin-size. Vacuum cleaners are not provided.

For newly arrived personnel, a Hospitality Kit including linens, cutlery, dishes, cooking utensils, vacuum cleaner, iron and ironing board, toaster, and other minor items, is provided for use until your air freight arrives, usually in one or two months.

To make the house your home, include in your household effects shipment small personal items and decorations. Since most entertainment is self-provided, also include stereo equipment, tapes, CDs, etc. TV programming and video tapes are PAL or SECAM. If you own a multi-standard TV receiver and multisystem VCR, bring them with you.

Some Station families employ Greek domestic help on a part-time basis, generally one day a week. An employee of a diplomatic mission may also sponsor a non-Greek household worker by accepting responsibility for bringing the domestic into Greece and for the individual's repatriation.

Guard at Entrance

Transmitter Building Main Entrance

Welcoming Committee for Visitors, who Sign the Guest Book in the Lobby

#### **HOURS**

American employees assigned to the transmitter site work eight hours, receive a half-hour lunch break, and may arrive between 7:30 and 8:00 a.m. The departure time between 4:00 and 4:30 p.m. depends on the arrival time. American employees assigned to the receiver site work from 8:00 a.m. until 4:00 p.m.

#### **CHECK CASHING**

The Station's Cashier cashes personal dollar or U.S. Treasury checks (from \$25 to \$500) for Greek drachmas at the daily-established rate of exchange. Travelers checks are available at the Station; however, dollars can only be obtained at the Embassy in Athens.

#### MAIL

The Station is served by the Greek mail system (Voice of America, P.O. Box 1001, 67 100 Xanthi, Greece), and the U.S. postal system (American Embassy KAV, PSC 108 Box 39, APO AE 09842). Letters sent via APO take an average of 14 to 21 days; packages (maximum weight 70 pounds and 100" girth) average 30 days. Since no trained APO handler is located at the Station, insured mail can be received, but registered mail cannot. In addition, personal outgoing packages weighing 16 oz. or more cannot enter the APO system from the Station. All packages must be inspected by and wrapped in the presence of APO personnel in Athens. International mail service in Greece is good. Both U.S. and Greek stamps may be purchased at the Station.

#### **TELEPHONE**

Since long distance calls originating in Greece are expensive, most Americans use an AT&T calling card and are billed at the stateside rate. For incoming long distance calls, use numbers (30591) 22855 or 22042, or (30541) 61120 or 61130. The Station's fax number is 30591 31310; its telex is 0452149.

### **RECREATION ASSOCIATION (VOARA)**

Membership in the VOARA is available to every employee and spouse at the Station with a \$100 refundable deposit per family. Activities vary according to members' interests and willingness to serve.

The Clubhouse contains a small commissary, bar, and pool, ping pong and exercise equipment. The RA maintains a 9-hole golf course, two tennis courts, a playground, and beach facilities on the sandy beach which extends along the southern boundary of the Station. It also loans books, audio cassettes, CDs and records from its 2,000 volume library, operates a closedcircuit television system which shows videos, and rents two two-bedroom guest houses on the compound.

### FITNESS

The Station's grounds are ideal for walking, jogging and biking enthusiasts.

### **DINING OUT**

The neighboring "tavernas" (family-run restaurants) serve delicious and reasonably-priced typical Greek fare, guaranteed to expand the waistline -- or your money back!

### CULTURE

Every June to September Athens holds a festival which features performances ranging from Greek tragedy to modern dance and rock groups -- often with internationally famous groups or stars from the U.S., Europe and elsewhere.

In Northern Greece, other than folk dancing which is a popular pastime, and summer performing arts at the ancient theater of Philippi, similar cultural presentations are few. A major exception is Carnival in Xanthi, the second in importance in all of Greece. This two-week festivity includes costume parties, folk dance performances from all parts of Greece as well as foreign countries, and vendors hawking their wares. The jubilation terminates with a masquerade parade and dancing in the street, seven weeks before the event of Orthodox Easter.

# SPECIAL OCCASIONS

# SOCIAL SERVICES

### **EDUCATION**

Operation of a "school at post" is contingent upon the number and grade level of students available and the desires of the parents. There is the option of sending students to boarding schools in Europe, or Athens and Thessaloniki in Greece.

### **EMPLOYMENT OPPORTUNITIES FOR DEPENDENTS**

No employment opportunities for dependents exist at the Station. This is an excellent post for spouses and older children to read, work on hobbies and crafts, grow a garden, or get involved in a physical fitness regimen.

### LANGUAGE TRAINING

Most leading shops, hotels and restaurants in Athens and Thessaloniki employ clerks who speak English. Unfortunately, this is not the case elsewhere. A basic knowledge of Greek makes living here both easier and more rewarding. Neither VOA nor the Station offers Greek language training. However, Greek language tapes may be obtained on loan from VOARA's library.

### MEDICAL CARE

Hospitals do not compare to U.S. standards, and doctors and dentists are not U.S. trained. There is no resident American doctor or nurse at the Station. State Department's Regional Medical Officer, based in Belgrade, visits the Station quarterly. Frankfurt or London are the authorized emergency evacuation locations.

### **RELIGIOUS ACTIVITIES**

No religious services in English are available nearby. On Sundays Mass is celebrated at the small Catholic church in Kavala.

Sweets

and Smiles Abound

### AIRPORTS

There is a domestic airport near Chryssoupolis, 20 miles east of Kavala, from which Olympic Airways operates one flight daily to and from Athens. This airport is 45 minutes traveling distance from the Station. Thessaloniki is the closest international airport, a 3 1/2-hour drive from the Station.

### **AUTOMOBILE**

Due to the remoteness of the Station and lack of readily-available public transportation, a car that is in excellent condition is a necessity. The main highways and city streets in Northern Greece are paved, although streets in the towns and villages are often quite narrow. Local garages carry very limited supplies of spare car parts, which are mostly for foreign-made cars and are quite expensive. It is highly recommended that you include in your HHE shipment a twoto-three-year supply of oil, filters and tune-up parts. Bring the ownership title with you, since it is needed to prepare the paperwork for customs clearance.

Auto insurance can be arranged at the Station, and super, unleaded or diesel gasoline may be purchased at the Station.

A valid Greek or international driver's license is required. Without one, you may not drive a privately-owned vehicle on Station premises, or an official vehicle either on or off the premises. The Station will assist in obtaining the international license, or purchase it from AAA in the U.S. prior to arrival and save money.

### **BEAUTY AND HEALTH**

If you have special brands of toiletries and cosmetics, bring a supply with you. Beauty and barber shops are plentiful and reliable. Over-the-counter medicines are available and reasonably priced.

### **CLOTHING**

Sufficient clothing for all ages is available on the local market in European sizes. Most families purchase the bulk of their clothing through U.S. mail order catalogs. Casual spring and summer wear is the norm, with a few occasions calling for more formal attire. Also bring woolen outfits for the winter season.

### CUSTOMS, DUTIES AND SHIPPING

No special rules, limits, restrictions or requirements are imposed on official U.S. employees or their dependents when entering the country. Personnel assigned to Greece must have a valid Greek entry visa in their diplomatic or official passports.

Since personal effects are authorized duty-free entry, they must be for your personal use only and not for sale. Drugs and narcotics may not be imported under any circumstance. Surface shipments from the U.S. may take three months to arrive. After clearing customs in Athens (port of Pireaus), they are trucked to the Station. Most employees prefer to fly to Athens (on their transfer travel orders) to pick up their personal automobile and drive it to the Station. Consult the RSI for current shipping addresses for air freight, household effects and vehicle.

### DRY CLEANING

The dry cleaner in Xanthi is not on a par with U.S. standards.

### **FILM**

Kodak film is available; developing service takes only one hour. Both are expensive.

### FIREARMS AND AMMUNITION

Greek law prohibits importing rifles and handguns of any kind. Under no circumstance should you bring them, or ammunition, to Greece. Air rifles and shotguns of any gage may be imported by the owner only and must be registered in the passport. If they will be used for hunting, the owner must go to the Greek Forestry Department to submit the proper papers to have IDs issued.

### FOOD

Many Greeks still shop daily, so local food outlets thrive and are a very important part of every neighborhood. Each has its own butcher, greengrocer, bread bakery and pharmacy. Fresh fruit, vegetables, plants, eggs and chickens can be purchased one day each week at open markets in various villages. Saturday mornings both Xanthi and Kavala host open bazaars. In addition to foodstuffs, vendors display crafts from neighboring countries.

Meat and fresh produce are also available in Xanthi's covered market during weekdays and Saturday morning. Many shoppers frequent an Xanthi supermarket which is almost comparable to U.S. standards.

Greek wines are plentiful and inexpensive. While specialty items are expensive, there is virtually nothing that cannot be found in the Greek food market.

Aside from sweet shops, stores are closed on Sunday.

### **ID PHOTOS**

It is recommended that you bring 12 passport size photos which will be needed for various ID cards immediately upon arrival.

### PETS

Cats and dogs entering or departing Greece must have a health certificate validated in the country where travel begins, stating that the pet is in good health, free from infectious disease, and has had a rabies inoculation not more than 12 months (6 months for cats) and not less than 6 days prior to arrival or departure. Greek law requires that all cats and dogs be vaccinated against rabies every year. Personnel with pets should consider arriving at the Thessaloniki airport and completing check-in procedures at the Station rather than arriving in Athens, where pets must be boarded in a kennel to await the onward journey to the Station.

At the Station there are no restrictions on pets, except consideration for neighbors, since families live close together on a confined compound. Veterinarians, although more familiar caring for cattle and sheep, can handle routine matters dealing with domestic pets.

### AMATEUR RADIO

Please notify the Station of your ham radio interest so an attempt will be made whenever possible to assign you to one of the houses with a tower.

Bring a certified copy of your U.S. amateur radio license with you. After arriving in Greece, you will submit an application plus a nominal fee to the Ministry of Communication, listing the make, model number, serial number and output power of all transceivers, and type of antenna. Licenses are required for each mode of operation: fixed-base station; mobile; or portable. Upon your transfer from Greece, the equipment must depart with you, since it entered Greece duty-free.

### **TELEVISION**

The Greek Government has established a network of TV repeaters to rebroadcast satellite programming, including CNN International, from Western Europe. Video tape rentals are available locally. Since all programming and tapes are PAL or SECAM, a multi-standard TV receiver and multi-system VCR are necessary and may be purchased through the AAFES mail order catalog.

# MEDIUM WAVE ANTENNA ARRAY PARAMETERS

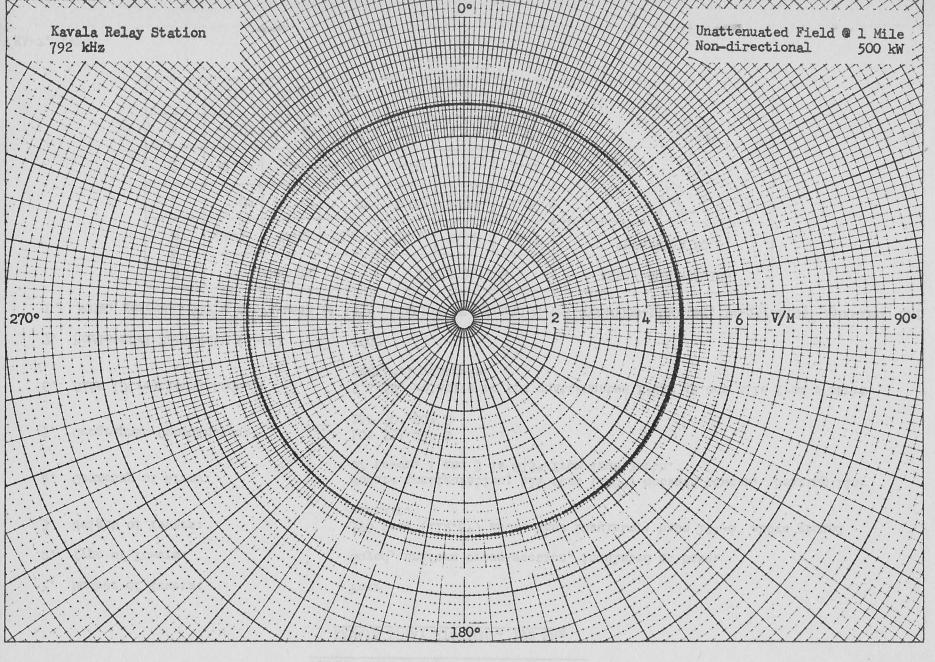

# KAVAIA FELAY STATION - 792 kHz

1.	Number of Towers:	Four
2.	Type of Towers:	Guyed, uniform cross-section, insulated at base.
3.	Height of Towers:	390 feet (112.8°) above base insulator; base 13'-6" above ground radials.
4.	Geometry of Array:	Square configuration; 414 feet (120°) between towers. Bearing line of towers 1 and 3 is 015° from True North.
5.	Geographic Coordinates:	40° 53' 20" N 24° 50' 50" E
6.	Gain (Directional Modes):	7.4 dB, relative to the unattenuated field at one mile from a short vertical monopole.
7.	Horizontal Beamwidth (6 dB)	102°

8. NOTE: European MF/LF Conference of 1975 restrict MF operation to: NDA-0800-1500 GMT, DA-15/or195°-1500-0800 GMT
