## Oxygen of Democracy Series Returns

The popular *Journalism, the Oxygen of Democracy* series returns to the VOA Museum Thursday, February 19<sup>th</sup> featuring celebrated author, Tim Love. Love will discuss his latest book, ***The Medium is the Mirror- the Reformation Over Truth Reshaping our Relationships, Politics and Sacred Beliefs.***

Finding truth in information is one of the most challenging issues facing America, and the world today.

We no longer live in a media environment dominated by speech alone; it includes systems that shape attention, emotion, and beliefs. Laws written to protect neutral distribution and free speech, cannot compete with platforms designed to persuade, reinforce, and condition behavior for profit.

Laws that guided development of the early Internet, are incompatible with today's AI environment.

Mr. Love will explain how advancements in neuroscience and technology (known as Neuro-Dystopian systems) have infiltrated mass media through the use of AI. Currently operating under minimal legal regulation, they reshape our public life, and Love believes this is not a free speech crisis—it is a governance gap.
